Tarik Terzo

PHP Developer

I highly motivated person whose attention is most attracted by technology. I started learning two years ago. I started with the basics of information Systems. I know how to work on Windows and Linux. I also made a templates in HTML5 and stylization with CSS. The database I use are SQL. I am mostly dedicated to the PHP programming language. I know the basics of the JavaScript programming language. I worked on various projects in the form of practice and independently.
